2020 *Kaigai Shinja Benkyōkai*

Shinji

Presently, society is in the midst of great change.

The path of truth lies in a society that harmonizes and in a humanity that evolves. However, the path taken by humanity until today has forgotten the existence of Kami, opposed the power (unmei) of nature, and lowered the jittai.

The power created by humanity is small and meager.

Politics, the economy, religion, learning, science, medical science, social welfare—the flow of all today has become static; humanity is in confusion and hardships deepen.

This is an era when shinja must learn the teachings, understand the principles and live.

The teachings show the kokoro (life) the path, and provide awareness to what should be done now (today).

The society that will emerge hereafter will be guided and harmonized in the hands of Kami. Until that time, the changes in society will be great and fierce.

Shinja should learn the teachings as a family and create a family that lives by the teachings to remain unconsumed by the power (unmei) of the times.

This movement of the kokoro will protect the kokoro (life) and guide it to a life of many joys and hopes that are fulfilled.
