

*Shinji*

*You must learn the teachings and strive to live by the principles to achieve a life without regrets.*

*Endeavor is needed in life, but it does not bear fruit unless the objectives are correct.*

*You must know your unmei-jittai to have the objectives to live.*

*Understand well this one principle; what is needed is effort that is true and accurate.*

*The first step to achieving awareness based on the teachings is to know your jittai.*

*The jittai is elevated the more you live by the teachings, and you will perceive a life that is one with your unmei.*

*You will also naturally perceive the objectives in life and your endeavor increasingly comes alive.*

*To the Shinja*

*Strive to be the person (existence) who can explain the worth (the significance) of living by the teachings to family members and relatives.*

*Your existence will shine and your life, where dreams and aspirations come true, become the role model that allows family members, relatives, friends, and acquaintances to know the meaning of life.*

*If all human beings live their life supported by the teachings, they will always live out a life (an era) without regrets.*

*A life that is without accidents, disasters and filled with hopes and dreams will emerge.*

*Strive to understand that today is the time (an era) when Kibō no Michi (the path) manifests with the correct effort to live by the teachings.*
