

Shinji

Learn the teachings and be the shinja who understands correctly the condition of society and the direction it is headed.

What do people (humanity) who live in society believe in, what supports their kokoro (life)?

They suffer of their own accord and lose their way as they agree with the thinking and ideas of that moment and depend on knowledge without principles.

Be aware that the freedom and equality that people (humanity) seek are ideas that come to life when awareness is gained from the principles.

The power (unmei) of an era is moving in the hands of Kami during this time (today) when the principles that are the support in life, are not perceived.

Kami reveals to the world (society) through Shisha, the truth and the principles on how the world should be so that your kokoro (life) will not be consumed by the changes, and regrets will not be left behind in your Kokoro no Michi.

Shinja should learn the Shinji (the principles) revealed in the Kokoro no Michi and Kokoro no Moto lectures with their family and practice and make the best of them together.

The stronger this thought (conviction) is, the more the kokoro of the shinja will anchor and doubts will disappear. The truth about how society should be can be seen in a society that evolves as the unmei comes together and is enhanced.

Nature supports people, enriches and provides a comfortable living environment and abundance.

Be aware that a society created by people (humanity) steadily produces results when it harmonizes with the natural environment.

Summary of the Shinji

The era is greatly changing its flow. It is important to learn the teachings through the *Shinji* so we will not be consumed by this flow of changes and will be able to accurately understand the direction society is moving and changing. If we do not do this, we will struggle, be at the mercy of the information and knowledge that inundates society today; and we will lose our way.

What do people, who don't know *Kami's* teachings, depend on as they live out their lives? Their *kokoro* tends to be consumed by the knowledge they see and hear; their thoughts are confused; and they are overwhelmed by the flow of information. However, the knowledge that overruns society today contains very few principles and hardly anything about the natural way of things. Thus suffering and doubt are created.

Many people go against the path without understanding the correct approach and attitude as they clamor for freedom and equality. Freedom does not mean that we are free to do whatever we want. Freedom is the ability to use your *unmei's* strengths freely for the sake of others. This is the correct definition of freedom.

Equality does not mean that our physical and innate strengths, appearance, and other attributes are equal. It does not mean we have the right to act, speak or to think without hinderance or restraint. But, what is true is that an *unmei* to be useful in this world was given equally to each of us. This is equality. If we are aware of this, we would not futilely advocate our equality based on a superficial definition.

The power of an era's *unmei* is moving and guiding society in the direction it must go in a time when humanity does not understand the truth and the principles on how the world should be. Thus *Kami* is revealing to the world through *Shisha*, the truths that are occurring in society and the correct way to live as it was originally intended so that as we come to know this reality, we will not leave behind regrets in our life.

What is needed is *Kami's* guidance, to learn the *Shinji* as a family, and to make the effort to put them into practice in your family life. The stronger your conviction to do this, your *kokoro* will anchor and doubts will disappear.

The world that *Kami* created is a place that moves peacefully, where the strengths of individual *unmei* come together and are enhanced. This is the way society should be, this is how it works.

It works exactly the same way as the world of nature. The bounties and blessings of nature are mutually given and shared. They have also been given to humanity. Thus human society must first correct its way of thinking and its way of life. Humanity must recognize that successful results are achieved when people and all things harmonize.
