

The Main Theme for the Year 2022

Shinji

The birth of all life is in the hands of Kami; accept the power (unmei) of an era and live out a finite period of time (an era).

Kami guides and protects life so that all unmei can come together in mutual support to allow time (an era) to flow.

To the Shinja

Cherish the teachings that Kami has given to the world (society) through Shisha—do not take them lightly.

Human beings live out a life guided by their unmei when they are from families that live by the teachings.

They will live a life of hopes and dreams when they become one with the unmei of an era and move with the flow (changes) in society.

Society is presently (today) changing its flow to a world that revolves and is one with the principles as its mainstay.

During this period, the person (humanity) who relies on knowledge without principles as absolute will be consumed by the flow.

The person (humanity) who gains awareness of the principles and deepens their understanding will come together with the unmei of the times.

During these times when the flow of an era is greatly changing as society separates into light and darkness, the world will be divided into light and darkness.

As a shinja, you must live by the teachings, hone your unmei, and strive (gain understanding) to live a life that is one with your unmei.

The teachings point to the changes in society.

The teachings point to the life you should live now (today).

Be the shinja, who lives and entrusts your kokoro in the hands of Kami and gains awareness from the Shinji, the principles this year.
