

*Shinji*

*People, who live their life (their kokoro) sustained by the principles, will increase; and society will stabilize.*

*What is required is to learn the teachings with family members and to endeavor to create a family that interacts based on the principles.*

*A family's foundation is created by a husband and a wife.*

*It is created when the unmei of both the husband and the wife comes together and is sustained by the kokoro of mutual support to give back.*

*Society's truths (condition) are in the hands of Kami; and the unmei (the power) of an era and the unmei (the life) of all people and all of nature come together, are enhanced, and maintain harmony.*

*Knowing this truth, shinja must not neglect the effort to create a family with family members that interacts based on the principles.*

*This endeavor creates a family in harmony and nurtures human beings (the person) who guide society on the correct path.*

*Society becomes increasingly aware of the principles; people (the person), who correct their jittai, will grow, and politics and economies will stabilize.*

*Simultaneously, a society that is not consumed by natural disasters will come to be.*

*Realize the truth that world peace is achieved when people, who live by the principles, increase.*
