

The Theme for the Year 2024

Shinji

Learn the teachings revealed to society (the world) through Shisha Tomomaru-kō with your family.

The kokoro of family members will gradually come together and they will become a family where the strengths of their unmei are drawn out.

What is missing in society today (now) is the knowledge about the worth of Kibō no Michi and the kokoro to abide by the path.

To a society that lacks principles and generates and relies excessively on information and knowledge, the kokoro to draw out, hone, rely on, and bring together the respective strengths of the unmei to support one another does not grow.

Despite having the knowledge, the learning to guide people on the correct path remains unfulfilled.

This is why the world is in conflict and turmoil, and a happy society cannot be achieved.

To the Shinja

Be aware that politics and the economy are knowledge that humanity has created; and ask Kami for the kokoro to see society correctly through the principles.

It is the strength of this desire that manifests Kibō no Michi and fosters human beings (people) who live guided by their unmei.

The principles correct knowledge.

The principles draw out and hone the strengths of the unmei and harmonize society.

The environment of the divine land of Japan will guide the world to peace and foster people who will live the correct path.
